-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2833

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 6-8 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Holliday et al 6352448.

Holliday et al discloses first connecting end 101, and second connecting end having support mandrel 20 with spurs 28, swaging barrel 22, and axially-moving swaging cap 12 having a variable inner diameter and which is coaxial with the swaging barrel and the support mandrel.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 9 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Holliday et al as applied to claims 1, 6 and 12 above, and further in view of Li 6386912.

Holliday et al substantially discloses the invention as claimed except for a center contact with tangs. Li discloses a center contact 40 having tangs 46, and to provide the

Art Unit: 2833

center contact 106 with inner tangs thus would have been obvious, to make better engagement with the inner conductor of the coaxial cable.

Claims 5 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Holliday et al as applied to claims 1 and 6 above, and further in view of Cannon 6609925.

Holliday et al substantially discloses the invention as claimed except for the connector being of the BNC type. Cannon discloses a coaxial BNC connector, and to form the first end of Holliday et al as a BNC connector thus would have been obvious, to better mate with another BNC connector.

Claims 4, 10 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: none of the prior art of record, particularly the applied art, discloses or teaches the first connecting end having a slotted barrel whose finger has a recess for strain relief.

The other references cited on Form 892 disclose similar coaxial or flexible connectors.
